MALLOW OR HIBISCUS

A hardy Perennial, grows four feet tall, profuse bloomer in July and August

# AUGUSTINE TREES AND SERVICE

---

## TRIMMING TREES

We have had so many inquiries about trimming trees from our customers that we will in the future where requested on the order, trim a sample tree of the order as a guide. Either peaches, apples, plums, pears or other fruits.

## TRANSPLANTING

Be sure and get your transplanting guide free. A small folder of condensed practical information, which if you follow carefully, will insure successful transplanting. A copy is packed in each order.

## AUGUSTINE TREES

When you buy Augustine Trees you buy more than the trees. You buy a service of growing, handling and packing stock that is an accumulation of more than fifty years experience as practical Nurserymen, Landscape Gardeners and fruit growers.

## DO YOU KNOW

In the last ten years the number of fruit bearing trees in the Middle West has decreased nearly one-third and there are but little over half the young trees in orchard not yet bearing there were ten years ago. When you consider this fact as developed by the census and remembering that of all agricultural pursuits the fruit grower is the one whose product has held up in price during the past year, one does not have to question whether it is worth while to plant fruit.

One bushel of good apples will pay for three or four apple trees.

Three cans of peaches will pay for a peach tree.

Three cans of pears will cost as much as a pear tree.

Two pounds of grapes will sell for as much as a grape vine costs.

If you are going to have fruit in your home and you must have it and plenty of it or pay more than it costs for Doctor's bills, the only way to be sure of it is to plant. Home grown fruit is always fresher and better than anything you can buy.

## PRICES

The prices quoted herein are for stock packed and delivered on cars at Normal. Cash with order.

## SIZE OF PLANTS

Two to three foot plants mean plants two feet in height.

Three to four foot plants mean plants three feet in height.

When plants are ordered three feet in height the price is for three to four foot plants. When ordered two feet in height the price is for two to three foot plants. There is positively no variation from this rule, as all stock is graded and priced in accordance with it.

## FRUIT TREES AND PLANTS

APPLES AND CRABS	Each	10	100
5 to 7 feet, first grade.....	1.00	9.00	85.00
4½ to 6 feet.....	.90	8.50	80.00

Billardi (pink spikes) 3 to 4 feet . . . . .	.60	5.50	45.00
2 to 3 feet . . . . .	.50	4.50	40.00
Salicifolia, similar to Billardi, and same price.			

# GLADIOLUS

JENNY LIND

For a number of years Mr. Augustine has been very much interested in this wonderful flower that has been so astonishingly developed by the hybridizers until at the present time it has no equal as a decorative flower for the home garden and as a cut flower.

We have made it a rule in the past to handle only hardy plants, but have decided we must put Gladiolus on our list.

Gladioli, blooming as they do from July until frost, when flowers are scarce, and being so easily propagated by even the novice in gardening, it pays well to plant the finer varieties.

A few rows of Gladioli planted in the flower or vegetable garden will be a great pleasure for three months.

## CULTURAL INSTRUCTIONS

Plant four inches deep in rich, well prepared garden soil, double or single rows, six inches apart. Give frequent and good shallow cultivation. Watering helps during dry weather.

**Cutting Bloom.** Leave at least four leaves when cutting to develop bulb. If cut when first blossom opens, cut off half inch of stem each day and give fresh water and they will open to the tip end and last a week or more.

**Digging.** Keep varieties separate and well marked. Dig after first light frost; cut off tops and let dry in shade for a week or more. Store as you would potatoes. Keep bulbs well ventilated, remove bulblets and plant one inch deep thickly; they will bloom the second year.

## Prices

Good Size Blooming Bulbs.		Each	Per 10
Alice Tiplady—large flower, orange saffron, beautiful and very popular . . . . .		.15	1.15
America—delicate lavender pink, an old standard variety . . . . .		.05	.40
Carman Sylva—pure snow white, slight lilac penciling in throat, with us the best white . . . . .		.35	3.00
Flora—canary yellow, the best yellow at the price, strong grower, a good variety . . . . .		.15	1.15
Gretchen Zang—brilliant pink, blending into scarlet, a showy, excellent cut flower variety . . . . .		.20	1.75
Gold—a new golden that with us is the finest yellow, first medal at National exhibit last year . . . . .		1.00	9.00
Golden Measure—second only to "Gold"; by many classed as the finest yellow . . . . .		.75	7.00
Halley—delicate salmon pink, darker on lower petals, an old popular variety . . . . .		.05	.40
Ida Van—flaming salmon pink, a gorgeous flower . . . . .		.15	1.10
Jenny Lind—a soft apricot pink, blending to pale yellow in throat, a wonderful flower . . . . .		.75	7.00
Le Marshal Foch—light rose pink, vigorous, large, has attained wonderful popularity . . . . .		.15	1.10
Loveliness—delicate creamy yellow, blending to faint rose in center . . . . .		.10	.80
Mrs. Watt—striking rich wine red . . . . .		.10	.80
Mrs. Dr. Norton—light pink, yellow throat, strong spikes, excellent . . . . .		.25	2.00
Mrs. F. Pendleton—very large, showy flowers, delicate pink, large red velvet blotch in throat . . . . .		.10	.80
Mary Pickford—a delicate creamy white, throat soft yellow, a charming flower . . . . .		.30	2.50
Myrtle—delicate pink shading into deeper pink, a cut flower favorite of florists, charming . . . . .		.15	1.25
Panama—large bright pink, shading to light pink in throat, refined . . . . .		.10	.75
Peace—an old favorite, creamy white, delicate lilac marks on lower petals . . . . .		.10	.75
Prince of Wales—a brilliant rich salmon, deeper shade in throat . . . . .		.10	.85
Schwaben—light yellow, deeper center with brownish red blotch, very good . . . . .		.10	.75
War—deep solid blood red . . . . .		.10	.75

## IBOLIUM PRIVET

At last an ideal privet for the Middle West has been developed by the plant breeder.

If the California Privet were hardy, it would answer very well, but every few years it is killed in Illinois and has been again this year.

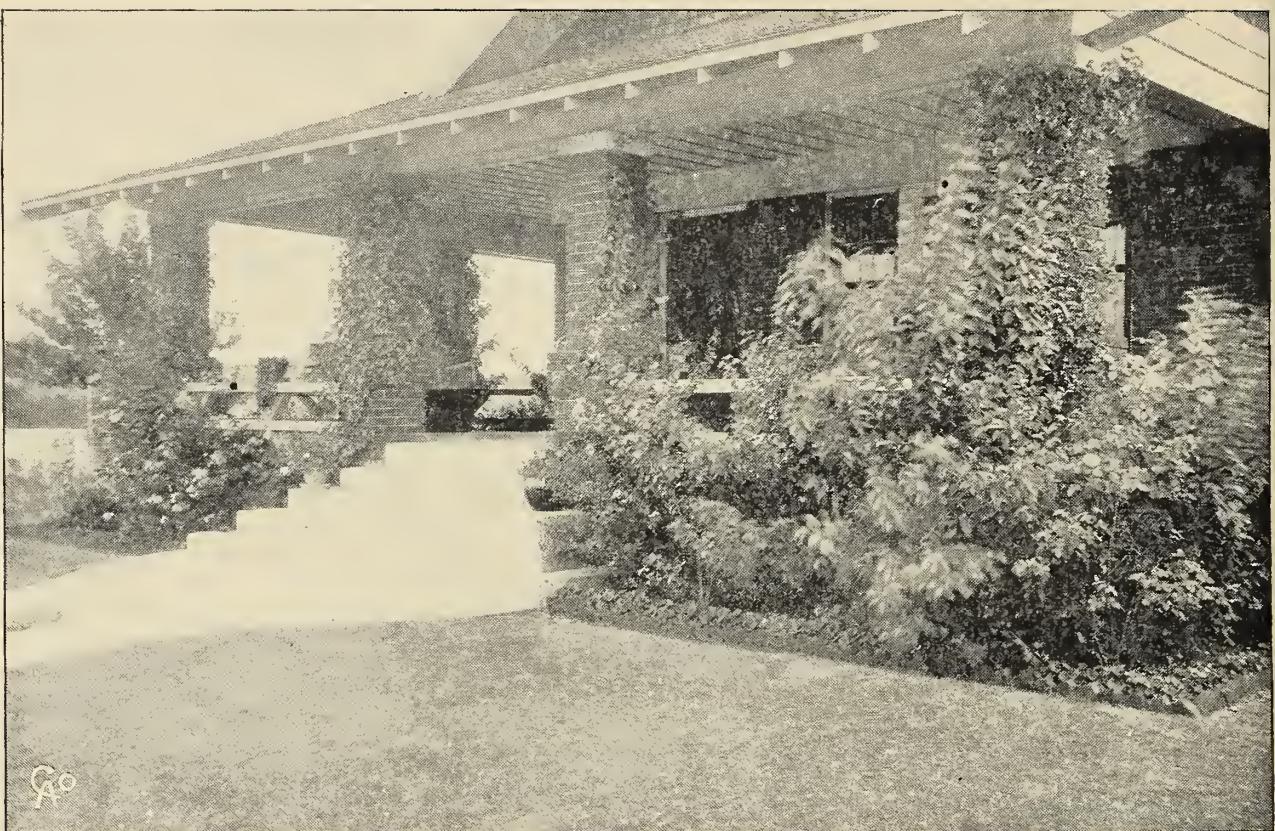

**Ibolium Privet** is a cross between California Privet and Ibota Privet, having the beautiful glossy dark green leaves and vigorous growth of the California and the perfect hardiness and low branching habit of its other parent, Ibota. The leaves in fall change to a rich bronze green and remain on until severe freezing weather.

We believe this new **Ibolium Privet** is going to be the great ornamental hedge plant for the Mississippi Valley, both north and south.

This is the first time **Ibolium Privet** has been offered to the planter and we are fortunate in having a splendid stock of the finest bushy plants we have ever seen.

Prices:	10	100
18 to 24 inches, well branched.....	3.50	30.00
2½ to 3½ feet, 7 to 12 branches.....	4.00	35.00

You will make no mistake in planting the new **IBOLIUM PRIVET**

#### FOUNDATION PLANTING

This view will illustrate to you the value of a few shrubs, well selected, and properly arranged for foundation planting. Can you imagine the barren scene presented before the home-lover consulted the Landscape Architect? The house must be framed and tied to its environment, made to look as if it belonged to just the one place it stands. This can only be done with foundation planting of shrubbery.

Considering the cost of such work as illustrated can you conceive of any place where a few dollars could be more judiciously expended, to reap more comfort and enjoyment to yourself, your neighbors, and the public? Furthermore, each succeeding year the charm and beauty increases in value, as money at compound interest, and enhances the value of your home correspondingly.

We make no charge for plans and specifications where we supply the planting material. Our stock is grown to the highest degree of perfection, thrifty, vigorous stock, that will attain a wonderful flower and foliage effect the first season, and when our plans and instructions are complied with, are guaranteed to grow.

Our plans and directions are simple and direct, easily read and understood and anyone can enjoy the pleasure of planting and developing their property with perfect safety.

## FLOWERING SHRUBS—Continued

Van Houttei (Bridal Wreath) the one most popular shrub—

3 to 4 feet . . . . .	.45	4.00	34.00
2 to 3 feet . . . . .	.40	3.50	30.00
18 to 24 inches . . . . .	.35	3.00	25.00
12 to 18 inches, for hedges . . . . .	.25	2.00	18.00
